Laminate Heating

Floor heating for wooden floor finishes is increasingly popular amongst homeowners as it creates a warm and cosy ambience in a room. Whether you are installing engineered wood flooring or natural wooden floorboards, Warmup's electric floor heating system can be used with wooden floor finishes.

Our heaters are foil based or free form cable ensuring even heat distribution throughout the room.

Features

- Flexible, highly durable material designed to withstand the weight of heavy furniture if installed correctly.
- Floor sensors work in conjunction with an intelligent Warmup thermostat, ensuring that the temperature never exceeds 27°C* under the laminate
- Heating is effective within 2-6 hours of switch-on.
- Has no protruding cables or hardware for prying little fingers, making it child and pet friendly.
- 100% waterproof.

* as recommended by wood manufacturers

Running Costs

Medium Bedroom	5m ² - 7m ²	\$0.30/kwatt/hr	6 hours per day	= \$ 1.76 / day
----------------	-----------------------------------	-----------------	-----------------	-----------------

NOTE

Every 1°C reduction in the temperature setting of your thermostat will result in a 5% – 8% reduction in power usage and cost over 24 hours.

The calculation of running costs can only be approximate. The actual cost will depend on several considerations –user preferences, temperature and switch-on time setpoints, cost of energy etc.
