Undertile Heating

Ceramic, porcelain, terracotta, stone, slate, marble or wood - undertile heating makes your tiled floor feel as great as it looks. In fact it enhances the appearance of the whole room because there is no ugly hardware in sight. The heat from an undertile heating wire transfers to the floor surface quickly, warming the floor surface where you require it. If it wasn't for the lovely warm feeling in the room, you would never know it had been fitted.

Radiant heat is recommended by health professionals, especially for asthma sufferers.

Warmup's undertile heating system is a result of more than two decades of advanced research and development. Warmup brings you a new dimension in affordable, luxurious, effective heating which is simple to operate and maintenance-free.

Simply set your thermostat to the desired comfort level and feel the luxurious warmth.

To ensure optimal heat retention, consider installing with Marmox insulation boards - enquire with our sales team.

Undertile Heating with Marmox Insulation Board
Installed on a Timber/Concrete Floor

Running Costs

| Medium Bathroom	3m² - 4m²	$0.30/kwatt/hr	4 hours per day	= $0.60 / day

NOTE

Every 1°C reduction in the temperature setting of your thermostat will result in a 5% - 8% reduction in power usage and cost over 24 hours.

The calculation of running costs can only be approximate. The actual cost will depend on several considerations - user preferences, temperature and switch-on time setpoints, cost of energy etc.
